* **Speed Meet** is a structured event designed to facilitate quick and efficient networking or introductions among participants. The goal is to maximize the number of interactions in a short period, making it a fun and efficient way to meet new people. It is similar to speed dating but can be used for various purposes, such as professional networking, team-building, or social gatherings. Here is how it typically works:

- 1. Setup:** Participants are seated or standing in pairs, often in a circular or linear arrangement.
- 2. Timing:** Each pair has a set amount of time (usually 3-4 minutes) to introduce themselves and discuss
- 3. Rotation:** After the time is up, one group (or individual) rotates to the next seat or place to meet a new
- 4. Repeat:** This process continues until everyone has met each other or the allotted time for the event is over.
